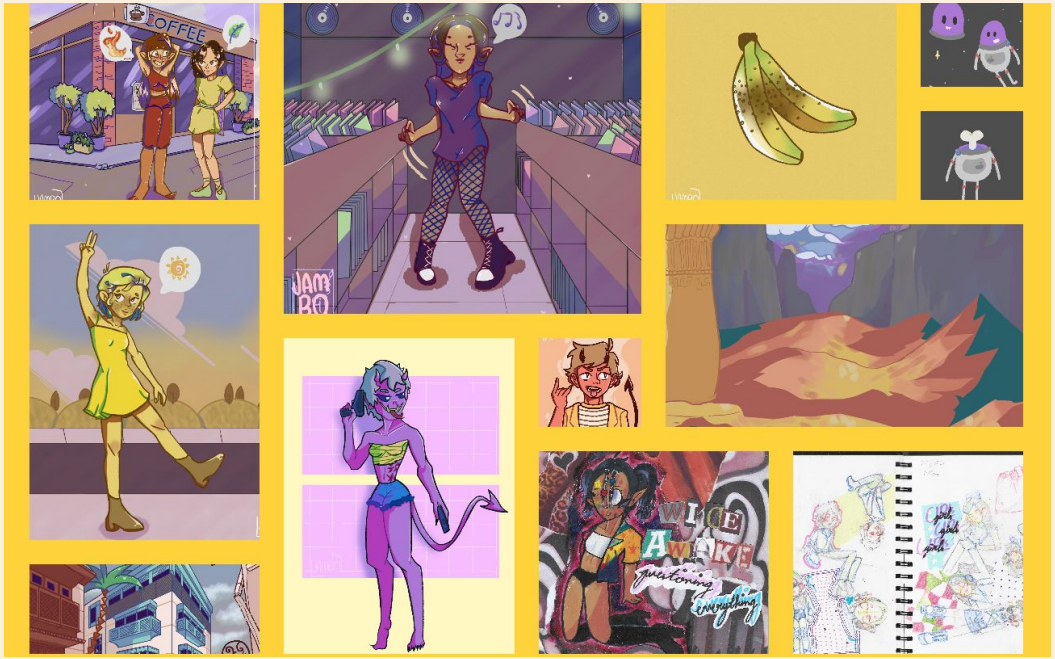
Bento Grid



```
326
327  .grid-item img:hover {
328    opacity: 60%;
329  }
330
331  .grid-item.medium {
332    grid-row: span 2;
333    grid-column: span 2;
334  }
335
336  .grid-item.large {
337    grid-row: span 3;
338    grid-column: span 3;
339  }
340
341  .grid-item.small {
342    grid-row: span 1;
343    grid-column: span 1;
344  }
345
346  .grid-item.tall {
347    grid-row: span 3;
348    grid-column: span 2;
349  }
350
351  .grid-item.wide {
352    grid-row: span 2;
353    grid-column: span 3;
354  }
```

Vertical expandable navBar

NavBar code (JavaScript)

```
<!-- NAVBAR ANIMATIONSS -->
<script>
  const toggleClick = document.querySelector('.toggle-box');
  const verticalContainer = document.querySelector('.vertical-container');

  toggleClick.addEventListener('click', (e) => {
    e.preventDefault();
    toggleClick.classList.toggle('active');
    verticalContainer.classList.toggle('active');
  });

  let isDragging = false;
  let startX, startY, offsetX = 0, offsetY = 0;

  verticalContainer.addEventListener('mousedown', (e) => {
    isDragging = true;
    startX = e.clientX - offsetX;
    startY = e.clientY - offsetY;
    verticalContainer.style.transition = "none";
  });
```

```
  verticalContainer.addEventListener('mousedown', (e) => {
    isDragging = true;
    startX = e.clientX - offsetX;
    startY = e.clientY - offsetY;
    verticalContainer.style.transition = "none";
  });

  document.addEventListener('mousemove', (e) => {
    if (isDragging) {
      offsetX = e.clientX - startX;
      offsetY = e.clientY - startY;

      verticalContainer.style.left = `${offsetX}px`;
      verticalContainer.style.top = `${offsetY}px`;
    }
  });

  document.addEventListener('mouseup', () => {
    isDragging = false;
    verticalContainer.style.transition = "0.4s ease";
  });
</script>
<!-- END OF NAVBAR ANIMATION -->
```

Made with ★ in Brooklyn, NY

What's left to do?

- Almost everything I wanted to implement :P
- Mostly finishing illustrations!!
- Fix navBar..
- Scrolling animations would be sick
- Add more personality and animations in background
- Add a section for experiences tehe
- Probably get a domain handle

- Make navBar horizontal for mobile
- Add more media queries
- Make mobile/ other queries more animated and fun
